

RINGER

Ground anchor

to set up a stop end for ground slab and foundation.

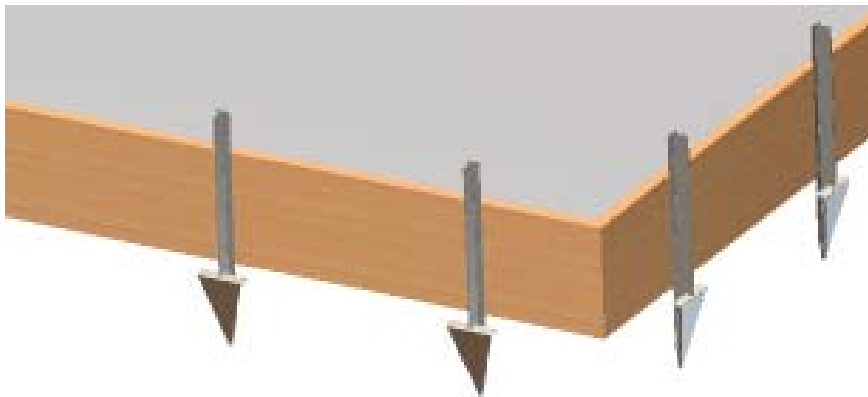

Advantages:

- easy and quick to use, thus cost effective
- due to the sufficient width, can be used in soft soil
- special shape for easy retracting
- surface hot-dip galvanized for longer durability
- robust material, thus more resistant to deformation at cone end

Data:

Length: 85 cm

Width: 20 cm

Item	Art.-No.	Weight
Ground anchor for stop end galvanized	230V3	4,00 kg
